

IMPACT RESISTANCE TESTER - DIRECT

Surface coating impacts play an important role in the industry of paint. It plays an important role in keeping well-furnished products. The impact of the surface can be tested with the help of a machine commonly known as an impact resistance tester

Features :

- The body is corrosion-resistant with a high quality structure.
- Easy to use machine.
- Chrome plated for an aesthetic look.
- Manual handle.
- Structured by industrial standards.
- Accurate results.
- Free falling weight mechanism.
- The instruction manual is provided along with a calibration certificate.

Specifications :

- Maximum Impact Height : 1 meter
- Weight : 1 Kg & 2Kg
- Diameter of Die : 27+/-0.3mm
- Diameter of Punch : 20+/-0.3mm

4B Testing Impact Tester for a Paints Direct used mostly in Paint Industry. The energy of load exerted can be varied either by using different heights of fall of different dropping weight.

Coating attached to substrates are subjected to damaging impact during the manufacturing of articles and their use in service.
